Ian Bayly

Front-end Developer

ianbaylyy@gmail.com   604-537-5985   COQUITLAM,BC, V3E1K2

A motivated front-end developer proficient at developing responsive websites and web applications using React and other modern libraries. A natural leader and people pleaser with excellent communication skills. Passionate about application design and usability.

WORK EXPERIENCE

Techies of Tomorrow - Front-end Developer - March 27th 2021 - August 24th 2021
Worked in a cross-platform application development team as a Front-end Developer. Developed various industry projects at a high pace, agile and deadline oriented work environment.

- Developed the front-end of a CRM system for The Burnaby Board of Trade using NextJs, React. Applied server side rendering, responsive web development, dynamic routing, reusable components with props, React hooks, and fetching/manipulating data.
- Developed a photo sharing application for Smart City Media. Integrated various API's, complex state management and advanced CSS techniques in Nextjs.
- Demonstrated teamwork and collaboration skills, technical problem solving skills, and effective communication techniques to ensure effective, timely progression on tasks.
- Led communications between the team, management, and clients.

Woking Dragon - Driver/ Expediter - September 2018 - April 2020

Worked in a high pressure, demanding kitchen environment packing orders and managing a team of drivers. Developed great communication skills delivering orders, and excelled in customer service.

EDUCATION

BCIT - Digital Design and Development - Diploma - September 2019 - May 2021
Developed interactive, user-friendly media projects, responsive websites, integrated social media campaigns, and delivered visually appealing stories with dynamic, rich multimedia content. Core activities included:

- Designing and developing interactive modular components and responsive web apps with a mobile-first approach using React.
- Creating working environments using React, Next.js and Node.js
- Conducting usability testing to identify UI improvements.
- Leading a team of designers, front and back-end developers to create 2 different social applications.

SKILLS

Command over HTML, CSS, and Javascript(ES6+) languages

Comprehensive knowledge of React JS platform and core principles

Responsive and mobile first approach to user interface design and development

Restful API development and deployment using Node.js, Express, and MySql
